SWITCH SYSTEMS | **SYSTEM BASIS**

ALREADY A CLASSIC

SYSTEM BASIS SIMPLY BEAUTIFUL

System Basis from Merten is the first step into the world of exclusive switch design. Choose from over 125 different inserts - regardless of whether your design preference is for M1 or ATELIER.

Its special feature: the same covers and central inserts can be used for both switch ranges. If at any point you decide to switch to the other design, you can do so without any problems. System Basis is prepared for this eventuality.

ATELIER SMOOTH OPERATOR

Understated design with that certain something - this is ATELIER, the switch series with the soft, smooth lines. Frame and insert merge into one homogeneous unit in this popular switch range, which can be integrated perfectly into any interior.

ATELIER

M1 STRIKING AND ELEGANT

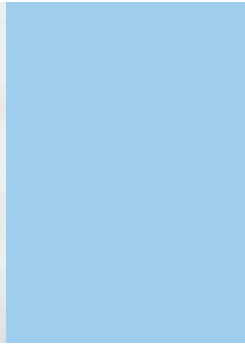

M1's classic form is guaranteed to satisfy every requirement. What makes M1 so appealing is the successful combination of functionality and a subtle yet distinctive design.
